

## Interim Norms for DOSO Subscales

Black circle = 50<sup>th</sup> percentile score  
Dark blue = 25<sup>th</sup> to 75<sup>th</sup> percentile range  
Light blue = 10<sup>th</sup> to 90<sup>th</sup> percentile range

Computed using data for the 40-item DOSO questionnaire. These interim norms also may be used for data from the 28-item DOSOs forms (short form values for Speech Cues and Listening Effort are only slightly different).
